

**April Ops Chief Meeting - Ft. Belvoir**  
**Thursday, April 8, 1999**

**Presentation and Opening Remarks by Ms. Jill Pettibone**

The Critique Sheets from the February 21 - 26, 1999 Group Leaders Conference has been consolidated. The info letter concerning the feedback will be given to the field in the near future. Generally, the feedback was good.

The NASA IG conducted a review recently at DCMC Boeing, Hunting Beach, CA. The NASA IG report included a finding that the DCMC EV Monitor did not have the mandatory classes (BCF 102 & BCF 203) cited in the One Book. Currently, DCMDW has no training quotas for these EV classes. A CBT in for BCF 102 is scheduled to be released in July of this year. DCMDW is preparing a package requesting EV Training.

The Training Executive Steering Committee is addressing the Matrix Certification Group which is being led by Ms. Marialane Schultz from the Business Group. They are looking at the broad workforce and developing a program for the next Millennium. Will be looking for input from a Joint Steering Group made up of personnel from DCMC-O/DCMC-B/Districts.

SPI Executive Council covered two areas.

1. The process of "Determination of Commercial Items" and certain inefficiencies identified by industry. A DoD IPT has been tasked to do research.

2. Supplier Alliances. Can DoD use these, which are common in the commercial market place? Looking at strategy approaches from SPI to CMI to Supplier Alliances.
